"Fresh from the Gardens"

Less Criticism; More Co-operation

Within a few days Parliament will re-assemble at Ottawa after a long Christmas and New Year adjournment, and almost simultaneously the Legislatures of all the Western Provinces will meet in annual session. In view of the fact that at present political power is more concentrated in the provinces than in the provinces than in the hands of their elected representatives than is unusual, the critics of their Parliament and Legislatures very much for granted, but with the times temporarily out of joint, people not only take a greater interest in public affairs, but adopt a more critical attitude.

At the same time, the public develops, and when many people are inclined to do so, they expect the impossible of their public men, the very conditions which develop this attitude of mind also create problems extremely difficult of solution, notwithstanding the best intentions and keenest desire on the part of members of Parliament and Legislatures to sincerely grapple with and solve them. In their impatience for definite and immediate results, many people adopt a more unfair attitude towards those in authority, than towards those who are responsible. The people are anxious to do the best they can to overcome existing difficulties.

True, public men differ in their views as to what should be done, but in this they merely reflect the general public, and in these times it is almost impossible to find any two neighbors actually agreeing upon policies which should be adopted. True, too, public men are often compelled to do what they consider to be right, even though it may not be one which differentiates from the average man who today may be vigorously criticizing and condemning legislators for their mistakes. Because of the very magnitude and complexity of the problems now confronting the country, and many of which cannot be solved by any one Province or nation, but only through united action by all nations, making up reasonable and acceptable positions are essential to the security, welfare, co-operation and support of all.

When Parliament meets it will have the Duff Commission report on the railway problem to deal with. In striving to reach a solution of this large and intricate problem, some things will, no doubt, have to be done which will not be pleasing to this interest, or class, or community. Any solution will involve inconveniences and sacrifices, and if each such interest, class or group adopts a purely selfish attitude and emphasizes its own particular rights and privileges to the extent of ignoring the benefits to be conferred upon the whole country, then there can be little hope of any solution being reached.

At this time, as was the case during the war, individuals and committees must take the broader viewpoint of the welfare of the whole country. Our Parliament, like most other national legislatures, is not homogeneous. And this general statement of policy is likewise applicable to other large issues which now face Parliament. None of them can be decided upon local or provincial viewpoints; they must be dealt with as national problems. If people generally will keep this idea firmly fixed in their minds there will be less tendency to indulge in criticism, and the finding of solutions made easier.

In our Western Legislatures major questions that will call for consideration and action include the drafting and passage of wise and effective legislation dealing with such matters as adjustment of debts, arrears of taxes, balancing budgets, measures to alleviate unemployment, and to provide adequate relief where needed, while at the same time not further increasing taxes which now face the people to carry. To those masters our legislators, irrespective of party affiliations may, we believe, be trusted to bring their best judgment in really sincere efforts to find the very best policies and put them into effect.

Irrespective of what is done, or not done, there will, of course, be some dissatisfied people. Possibly, everyone will be more or less dissatisfied. Where one approves of what is done, others will disapprove, while in regard to some other class of people, they will be equally satisfied and equally dissatisfied with approval. It is ever so in a democracy, but it is out of this conflict of views and opinions that compromises emerge, and it is only through compromise that democratic representative government can be carried on. It is always the average view that must prevail for the average good, not the extremist views either of the right or the left.

The responsibility which would fall to the individual reader is, that through the responsibility for successfully "carrying on" and "carrying through" these troublous times does not rest solely upon members of Parliament and Legislatures. It rests equally upon the individual citizen. Instead of adopting a whole critical attitude, a fault-finding attitude, the individual citizen should extend friendly advice and assistance to his elected representative, and should co-operate with him, whatever he is everything which is right and desire or not. Only so can the best results be achieved in times of stress and difficulty like the present; only so, in fact, can a maximum of wise policies and good government be attained. It is not good citizenship, but the reverse of it, to make demand for impractical, impossible policies, and then to criticize and oppose what actually is done.

This is a call for all who care about whether in government or organization. They need not necessarily merge into one; in fact such a merging might be a mistake because constructive criticism in times like these is more important than in normal times; but all criticism should be constructive, and co-operation should be the order of the day. And it should be exercised fully and completely by the individual citizen who is expressing such action by his elected representatives in Parliament and Legislature and municipal council.

Scheme To Aid Fishermen

That Campbellton, Scotland, buy and equip fishing boats and men with them unemployed fishermen is a plan being considered by the town council. The town would be entirely supplied with latest fishing devices. They would be loaned to the men and the town and fishermen share in the catch.

Was So Short of Breath Could Not Lie Down to Sleep

Mrs. P. J. Chernoff, Shoemakers, B.C., writes:

"I had no trouble with shortness of breath until I got married."

"I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak."

"I took a large amount of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

Looking Into the Future Dean Inge Brown, Another Gleomy Picture

Dean Inge drew a picture of England 1,000 years hence when speaking in London recently. He considered that by that time England would have a population of only 20,000,000—about half the present population—and that they would live mainly in villages.

"Physicists and astronomers tell us that there is no reason why this planet should not be habitable. There is no reason why a million years hence, but that the human beings will be at all like us and recognizable as men is very difficult to say," he said.

"London may be a hundred feet under water 30,000 years hence, and another 100 years is due at some period which makes me think these islands are uninhabitable."

"Do not think it is at all possible that we shall ever colonize Mars and Venus or that we shall ever be able to go to Mars or Venus. We do not know enough about the solar system to do that," he said. "We do not know many people who have been to the moon which an ingenious American saw there."

"As for Venus, there is some reason to think the whole planet is under water. We might have one nice hot bath there before being devoured by a dinosaur. Besides, there is no atmosphere or oxygen there."

The Dean said that our race had not intrinsically made any progress since the discovery of tools. Skulls of 400,000 years ago which had been found were not much better to have as our own.

The changes going on were for the most part degenerative:

CHAPTER IV.—Continued.

Alan's estimate that his quarry could not be more than half a mile in the lead, was true enough, but a stern chase had been started and those bandits were aching from exhaustion, they had fear of death in their hearts to goad them on.

A whole hour, an hour of terrible labor, went by, and still no sight or sound of the bandits. With the exception of this pale and thin line with human life, the lives of comrades, at stade, a fear gripped Alan that those bandits had taken the south branch of the Aloska. If they had, Farwell and those two raw recruits might not have been bush; or Red might attack them, reckless fellow that he was, practically lone-handed, and get killed.

The chase was entering the Thal-Azzah forest, that wavy wilderness of lakes and streams and channels and many thousands of square miles in extent. Not far ahead the branch split into a dozen channels leading in every direction. Pursuit went on. A few miles more, and those canoes would be swallowed up in the treacherous mire.

But then, as he skirted around a headland, his prophecy yesterday to Haskell, and his conviction, founded on long man-hunting experience, that those bandits would surely follow if left alone, were suddenly proved true to the letter. On ahead, a vast thousand yards, he caught a fleeting glimpse of two, heavily laden canoes that carried six men.

Dipping faster, deeper, he and Bill and Larry paddled at a furious pace to come up with the race. The river was turbulent, the water high, and see only a few hundred yards in front. There was danger, a terrible danger, of running headlong into a blind ambush where all three of them would be killed outright and their canoes broken before they could start to shoot back. Every stroke, every curve, every clump of fags they skinned close past, was a deadly peril. They knew it, but they dared not slow up. They were taking their chances.

As they skidded out upon a shallow little lake, fringed about with tall fags, Larry suddenly heaved back on his paddle.

"Lift out! Look! Alan, look over there!"

Alan looked where he pointed, at the north shore, at the water's edge. The reeds, the pads had been broken through (the fags there); the reeds were parted, some of them trampled, their tops bent to either side.

It told the story to him. Hard-pressed, these men had whipped ashore to shake off pursuit; had lifted canoe to shoulder, and were trying

to cut north and hit another channel. Oblivious to ambush danger, they skinned over to the telltale break in the fags and drove out upon the mud. Alan and Bill slung the canoe upon their shoulders and started in the lead, following the signs, they started at a jog, back through the fags.

Within a few hundred yards they came to a little creek, a sluggish marshy stream, its bed a deep blue lake covering several acres; and there, within the Thal-Azzah, late in the afternoon, the long relentless chase came to its end.

Larry, a dozen steps in the lead, glimpsed the silvery sheen of water ahead; and stopping dead-short, motionless, he stared across the lake. They bellied forward toward the lake edge where the fags were thin and they had clear view.

After several minutes of waiting, Larry pointed across the lake and said quietly:

"You see that big patch of brownish fags over there, about thirty or forty yards back from the water? See that little run leading back into them? That's where our men are hiding. They're laying low along that little run. We've come back in a hurry. Then, there's a silent spot over there where I don't hear any bird or animal calls. And then some other signs..." He was silent for half a minute. Finally he went on: "Now, do you see? You see that pair of canoe-paddles sticking up this way? They're dying low, making for this lake. Canoe backs like blue water. Watch 'em close."

Skimming just over the fags, the pair of men who had been hunting them, they stopped, hesitating and started the glide down upon the lake, they suddenly breasted high up in the air, exactly over the spot Larry had indicated. Veering away, they winged swiftly out of sight into the west.

Lying there, Alan and Bill lay silent, watching the bandit covert and plotted to plan. If all five of his men had been along with him, the outcome would have been swift and certain. He could have come at the bandits from either side, cut off their escape route, and pinned them between two fires and deliberately shot them down. But he had split his party. As he lay there, the Law believed in his patrol, his life curried in scorn at the caper expression.

"The Law that's supposed to be back of us, I wonder where in h—l it is now! What does it mean to Bill and me now?"

In the dim twilight, Alan and Bill were up against six men who had stoned off fifty and who had murder charges hanging over their heads. And if they broke away, Larry single-handed would have to stand the whole brunt of stopping them.

again to see what it is. Don't shoot when just one man shows up. We'll wait till we have three of them in plain sight. If we get three of them at the first crack, we'll be fighting the other two down on the right. Now, Bill, when you're looking down a rifle barrel at those men, don't hesitate. Aim straight. We can't make prisoners of that outfit. This is a final fight. One or the other party is going to get wiped out."

They started for the fourth musket house.

(To Be Continued.)

New Airplane Nearly Ready for Delivery

Prince of Wales' Machine Will Carry
Twelve Passengers

The Prince of Wales' new aeroplane, a powerful twin-engined high performance monoplane, is expected to be ready for flight early this year. The prince's private aerodrome at the Bow Valley Ranch, near Banff Park, has no hangar accommodation for a machine of this size, and, together with the light aeroplane which the prince has used for the last year or so, it will be housed at Head-on-the-Lake.

Like the prince's other aeroplanes, the new machine will be finished in scarlet and blue, making it easily recognizable in the air. Normally the big saloon cabin will be furnished for the comfort of not more than twelve passengers, though there is room for 12 if necessary.

This means that the prince will be able to travel with all of his luggage and members of his entourage in the same aeroplane, something which he has done in his other craft when urgency goes with the prince's own partiality for air travel to oblige use of the air way. The pilot's cockpit forward will be equipped with full dual control, and the machine will be fitted with the latest private aeroplane owners and a good pilot himself, certainly to be expected to spend much of his time aloft in one of the pilot's seats.

Men and Machines

More Pictures Which Show Great
Differences in Production

In ancient Rome, it took one shoemaker 5½ days to make a pair of shoes. In modern, a modern shoe factory, one man produces in the same time, 52 pairs of shoes.

Five thousand years ago a brick-mason produced in a day, not more than 400 bricks. One mason today, working in a brick factory, can produce 400,000 bricks.

A century ago one man produced 25 tons of pig iron a year, and 800 men in the iron works in Minnesota in 1929, produced 1,000,000 tons of iron per man per year was 20,000 tons.

One man today produces more electric light globes in an hour than one man could produce in 9,000 hours in 1919. In fact, one man today, using one machine, can supply the entire Canadian import of electric light globes.

One hundred men, working in a modern brick factory, could supply all the bricks needed for a modern city. No other brick factories, no other man to make bricks, would be necessary.

A modern steel rolling mill in full operation runs with almost no continuous attention, and requires only a handful of men.

Many Have Decoration

French Legion of Honor Held By
153,049 Persons

Holders of the Legion of Honor now number 153,049, according to statistics just published in Paris. This number includes thousands of foreign citizens who have been granted decoration which all Frenchmen aspire to gain. The chevaliers number 125,150, the officers 21,213, and the commanders 3,145. Holders of the Grand Cross total only 78.

Large numbers of men formerly employed in radio manufacturing plants in the Netherlands are returning to work.

Dog fish oil is a preparation for fighting mosquitoes away.

Throw OFF That COLD!

Some men and women fight colds all winter long. Others seek the cure. Aspirin relieves the first symptoms of a cold no further. If a cold has caught you unaware, keep on with Aspirin until the cold is gone. Aspirin can't harm you. It does not depress the heart. If your throat is sore, dissolve several tablets in water. Take them. You will feel better. There's danger in a cold that lasts for days. To say nothing of the pain and discomfort. Aspirin might have spared you! All druggists; with proven directions for colds, headaches, neuralgia, neuritis, rheumatism.

Lord Nelson Saved Town

Displays Courage and Foresight
When Battling Caught Fire

E. B. Green, writer and editor of a magazine recalls an incident of a magazine recall an incident with Lord Nelson, showing the presence of mind of Lord Nelson, and how his prompt action saved a disaster. He And keep a quiet mind."

"In Nelson's day, vessels of the British Navy often visited Montague Bay, and it was here, on one occasion, that Nelson went ashore on a visit and saw from the veranda of a house that Nelson still exists, that one of these men-of-war had been captured by pirates who blew up and the crew were discharged. Nelson's courage and foresight had saved

the ship.

"In Nelson's day, vessels of the British Navy often visited Montague Bay, and it was here, on one occasion, that Nelson went ashore on a visit and saw from the veranda of a house that Nelson still exists, that one of these men-of-war had been captured by pirates who blew up and the crew were discharged. Nelson's courage and foresight had saved

the ship.

"Let us then think only of the present, act only in the present, and to wander with curiosity into the future. This future is not yet ours; perhaps it will never be. It is exposing ourselves to temptation to wish to anticipate God, and to prepare ourselfs with what may be tomorrow's cross.

"With faith and love, and with the love of all the gals of the kingdom, Alabam in regal splendor!

I rather hear the voice of you in happy laughter flowing.

As when I heard it on a day when April winds were blowing.

I'd rather hear your singing voice like a lark, and the ring of cherubim and seraphim, And all the angels singing.

U.S. Employment

Estimated That 11,500,000 Were Out
Of Work in November

"An all-time peak" of unemployment in the United States was reported recently by William Green, president of the American Federation of Labor, who estimated that 9,900,000 persons were jobless.

Noting that this figure was greater by 130,000 than the previous high mark, reported for August, he added that word from affiliated trade unions indicated the total for early December was even greater than that for the previous month.

Prepared for Doubt

A fish from Chaco streams which dug itself into the mud and live for days is on its way to the British Museum. It has two bladders, in which it stores water for its migrations. When rivers dry up between the fish burns into the mud.

The sugar crop of the Philippines last season was 26 per cent greater than that of the year before.

Tea is said to be the world's best popular beverage.

Arrowwood Alberta

A. E. Starling went to Milverton Friday, January 13th to attend the Milo and District U.F.A.

A Co-operative Association comprising the Marview, Berrywater, Sunnyside, Clerkdale, Queenstown and Milo U.F.A. locals as a Director from the Arrowwood U.F.A. Purchasing Pool, to their annual meeting accompanied by M. H. Ward. Reports were given by Mr. Shorey and Mr. Mona, delegates to the Co-operative convention at Edmonton. Work of the past year was discussed and plans laid for even bigger purchases of fruit, merchandise, fuel, oil, etc., in the coming season.

M. H. Ward, as Director of the Oil Consumers' Co-operative, was asked for information and spoke at length on the advantages and benefits to be derived from co-operative buying.

The business concluded, the meeting adjourned to a later date, when it is proposed to hold a social evening and make other arrangements.

Yours truly,
HENRY ANDERSON

Annual Meeting of Ratepayers of the Buffalo School

The annual meeting of the ratepayers of the Buffalo School District, 1700, was held in the school house on Jan. 14th, at 2 p.m. The meeting was called to order by the chairman, who asked that the minutes of the previous meeting be read after which he spoke for the following statements and reports, namely: Teacher's Report, Financial Statement and Auditor's Report, Nurse's Report, Inspector's Report, and Trustees' Report, the same being read and passed as follows:

Teacher's Report—Moved by Mr. Parrish, seconded by Mr. Shatto.

Financial Statement and Auditor's Report—Moved by Mr. Parrish, seconded by Mr. Wyatt.

Inspector's Report—Moved by Mr. Shatto, seconded by Mr. Parrish.

Doctor's and Nurse's Report—Moved by Mr. Parrish, seconded by Mr. McInroy.

Nominations for Trustees—Mr. Frank McNeely was nominated by Mr. Parrish. There being no further nominations, Mr. Webb was declared elected.

Moved by Mr. Parrish, seconded by Mr. Wyatt, that the School Board, after taking the matter up with Inspector and the Department, with due regard to efficiency and economy, take steps to hire a teacher qualified to teach Grade X, should there be any pupils ready for that grade. There being no further business it was moved by Mr. McInroy that the meeting adjourn.

A. E. Starling, Secy-Treas.

WAGIN' TUNG

Vol. 2, No. 23 Arrowwood, Jan. 26 1933 Items for That

That Community Hall

That our active community is in favor of a hall there no longer can be a doubt. The scene has been a belligerent one, the hall is slowly warming to in favor of this exciting need of the hour for Arrowwood, and we surmise that not far in the future this fire will burst forth like a giant Vesuvius, and the entire populace will rise up as one man in its favor and construct it as that edifice was erected at Kainos' Bar. When something necessary has to be done, it is generally the women's organizations that really "get to going" and we surmise that if they would take the lead that the male populace would support it to a man.

THAT Little Ford motor in the "Six-wheler" has hauled those 44 and 5-ton loads until the speedometer is flirting with the 41,000-mile mark and still going strong on the same black and silver, and now we are going to let you in on the secret of this wonderful performance. This motor has had no other oil than British American Autolene Motor Oil. We are getting quite as "fussy" about Autolene oils as we are over our favorite brand of chewing tobacco. You may pay more for your oil but we are of the opinion that you will get no better lubricant at any price, and in Autolene oils we carry a weight and grade suitable to any internal combustion motor.

Remember we haul anything—anywhere—any time. The weather is a little colder and the roads a little tougher, but we need the groceries and for that reason we are glad to serve you.
